Welcome.

Your reputation is everything and our commitment to this philosophy brings...

- 1 service and simplification**
We are committed to not only helping you with your order, but also building a strategic relationship with you. We have simplified pricing with no set-up fees and no bleed or registration charges.
- 2 fast turnaround**
Fast folders should be a right, not a privilege. We offer 24 hour service on over 80% of our standards product offerings. Over 50% of our orders are shipped prior to the expected date and 99% of our orders ship on time.
- 3 over run commitment: your choice, not our policy**
We will call you before shipping overages. There is no charge for requesting exact quantity.
- 4 breakthrough printing**
Our gains in efficiency and drive for innovation have lead us to our new screened and textured foil options as well as product offerings with variable data.
- 5 sustainability**
We offer a variety of environmentally friendly stocks, use UV inks for flat printing, and recycle our foil and embossing dies as well as any stock that does not result in a final quality product.

production times

Production begins when artwork files have been approved

1 or 2 ink colors	24hr
1 foil stamping	24hr
blind embossing	3 working days
four color process	5 working days
heavy ink coverage*	6 working days

*up to 5,000 quantity; refer to page 34 for additional special services and descriptions

how to order your presentation folder in 6 easy steps!

1] select your style and quantity

Choose from over 60 standard styles or call for a custom quote.

2] select your stock type and color

Over 50 standard paper stocks are available. See page 35 for all samples.

3] select a business card slit option

a) Standard Business Card Slit options include: Horizontal, Vertical and Universal Half Moon.

b) Slits can be centered on either the right, left or both pockets for no additional charge.

4] select an imprint process

a) All standard inks are available in flat and thermography printing.

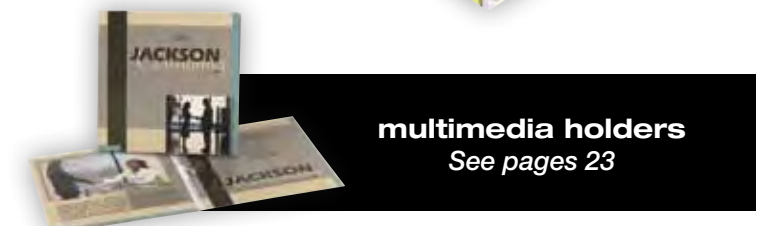

b) Foils may be flat, embossed or textured.

5] send print ready artwork

See page 33 for electronic guidelines.

6] indicate any special instructions

These include type style, point size and positioning.

NEW! variable data

Variable data products have changing elements within each product. Examples include: a name or address, phone number or title, a price, an image or a background.

requirements

Variable data folders are easy to order. Just provide the following:

- A composite proof of what the finished folders will look like
- All art or images that will be a part of the folder
- A database file

conformer® envelopes & portfolios

conformer® tip

Place a FedEx®, Priority Mail® or UPS® shipping label directly onto your Conformer® Envelope, promoting your corporate identity instead of your courier's.

U.S. patent number is required to print on all Conformer® Products: 6,116,651 Conformer® Folder • 6,227,444 Conformer® Envelope. Conformer® is a registered trademark of CONFORMER PRODUCTS, INC.

versatility at its finest

The Conformer® is just the right option when you have more than your regular Folder can hold!

This unique solution can accommodate contents of various thicknesses while offering the protection of a rigid paperboard, thus making it the most versatile in its class.

Adobe Photoshop®.....	Mac and PC
Adobe Illustrator®.....	Mac and PC
CorelDRAW®.....	PC only

We do not accept files created in the following native applications:

PowerPoint®.....	Mac and PC
Excel®.....	Mac and PC
Word®.....	Mac and PC
Publisher®.....	Mac and PC

APPLICATION REQUIREMENTS

PDFs — Macintosh or IBM Compatible

- All fonts must be embedded.
- All elements of the file must be colored per our guidelines.
- All placed graphics and images need to be high quality, colored according to our guidelines (at right) for the product ordered. Whenever possible, place vector images into the layout before converting to a PDF. Please be aware that when changes need to be made to placed images (coloring, mode, etc.), there is the possibility of the quality being compromised.
- Please name the PDFs without punctuation of any kind (except .pdf) or special characters. File names should be short.

QuarkXPress® — Macintosh or IBM Compatible

- When selecting fonts, you must use only the selected fonts owned by Navitor®, as listed on Navitor.com. If you are using fonts not owned by Navitor, outlines must be created in an illustration program before placing into your QuarkXPress® document.
- Never use the style palette to modify fonts. It will not hold when printed.
- Along with your file sent for placement, we need the supporting graphic file(s) given the same name as the graphic(s) in your document. (Changing the name after placement will make the graphic come up as "missing" or "modified" when read by our imagesetters.) Place graphics at 100%. Placed graphics need to be high quality or good vector art to receive the best quality printed product.
- Color all text and graphics according to the enclosed color specifications (at right) for the type of product you are ordering.

Adobe® InDesign® — Macintosh or IBM Compatible

- Change all text into "outlines" in your document.
- If you are using an imported graphic in your InDesign® document, be sure to include or embed the original graphic file. Place graphics at 100%. Placed graphics need to be high quality or good vector art to receive the best quality printed product.
- Save as an INDD file.
- Color all text and graphics according to the enclosed color specifications (on reverse) for the type of product you are ordering.

Adobe® Photoshop®

- Files must be saved as a TIFF without compression.
- Do not color an image in Photoshop® (for spot printing).
- Please submit black and white bitmap mode images at 600 dpi and grayscale mode images at 600 dpi for standard spot printing or Multicolor Inks. For full color printed folders, CMYK images need to be submitted at 300 dpi. Images that come to Navitor at a lower quality than what is recommended will be output as sent.
- Color all text and graphics according to the enclosed color specifications (at right) for the type of product you are ordering.
- All files need to be submitted at the size being used for printing.
- If bleeds are needed, allow 1/8" (.125") on all sides.

Adobe® Illustrator® — Macintosh or IBM Compatible

- Change all text into "outlines" in your document.
- If you are using an imported graphic in your Illustrator® document, be sure to include or embed the original graphic file. Place graphics at 100%. Placed graphics need to be high quality or good vector art to receive the best quality printed product.
- Save the file as an Illustrator EPS.
- Color all text and graphics according to the enclosed color specifications (at right) for the type of product you are ordering.

CorelDRAW® — (native files version 12 and lower)

- We do not recommend this application for full color layouts.
- If CorelDraw is used, we cannot guarantee that colors for full color products will match what is seen on screen. You will be responsible for any color issues if native CorelDraw file is sent.
- Follow established guidelines for all graphics. Placed graphics need to be colored correctly for the product ordered (at right). Placed graphics need to be high quality or good vector art to receive the best quality printed product.
- Create outlines (text to curves) on all type within a native CorelDRAW file.
- If there are text overflow issues, Navitor may need to resize or reposition text to fit the imprint area.
- Color all text according to the enclosed color specifications (at right).

CREATING YOUR FILES

Create one item sized correctly per document. (Placed graphics and text should be sized at 100%).

Fonts:

Using your illustration program, convert all text "to curves" or "create outlines" in your files. Never use the stylization palette to bold, italicize, add drop shadow to or put outline on your fonts. If you are using fonts not owned by Navitor, outlines must be created in an illustration program before submitting your artwork.

Margin Requirements:

Spot Color printing (one or more spot colors): artwork must have the position noted in the special instructions, or a sample must be attached. Four color process printing should have at least 1/8" (.125") margins.

Bleed Requirements:

- 1/8" (.125") should be allowed on all sides. Please make sure the text still maintains the required margin even when graphics bleed.

Color Requirements:

Navitor now has a new "Accurate Color" system. To our channel partners - you can now send your files colored the intended PMS color versus having to color it CMYK. Every effort will be made to print your intended color within acceptable standards.

Spot Color Printing:

1. Please submit black and white bitmap mode images at 600 dpi and grayscale mode images at 600 dpi for standard spot printing.

Four Color Process Printing:

1. Every element of the file must be colored with process CMYK colors (no RGB, indexed color, etc.).
2. Pantone® colors - While we are often able to closely reproduce a spot PMS® ink using four color process, PMS® spot colors and process colors are produced using different methods. Therefore, colors produced in four color will differ from Pantone® spot colors, sometimes significantly. Please refer to a Solid to Process Color Imaging Guide for color conversions.

Multicolor Printing:

1. Every element of the file must be colored according to the Multicolor color mix chart (visit Navitor.com) or it may be necessary for us to question the color correctness, which would delay your order.
2. If the CMYK mixes used in your file do not match the Multicolor numbers chosen, we will use the file as is and print as a "CMYK Scan" with no guarantees.

PRINTING BLACK VS. BLACK For Four Color and Multicolor Orders

Use printing black (C-80%, M-80%, Y-80%, K-95%) instead of 100% black when in registration with other colors, in areas with heavy ink coverage, and for bold type or lines (2.5 points or thicker). Use 100% black in all other instances. If the CMYK mixes used in your file do not match the Multicolor numbers chosen, we will use the file as is and print as a "CMYK Scan" with no guarantees.

HOW TO COLOR YOUR FILES FOR SPOT COLOR PRINTING

One Color Imprint:

If ink colors desired are:

Black
Red
Light Blue
Brown
Green
Burgundy
Gray
Dark Blue
Teal
Forest Green
Orange
PMS Ink
Any color not shown
Any foil or embossing

Use these colors:

Black
Red
Light Blue
Brown
Green
Burgundy
Gray
Dark Blue
Teal
Forest Green
Orange
New (see color requirements above)
Black
Conversion (crucial for die ordering)

Two or More Color Imprint:

If ink color desired is:

Black & Light Blue
Dark Blue & Red
Black & Red
Black & Brown
Black & Dark Blue
Light Blue & Red
Black & Burgundy
Any 2 Std. not shown
Black & 1 PMS Ink
2 PMS Inks
1 Standard & 1 PMS
Black & Foil
Black & Embossing

Use this color:

Black & Light Blue
Dark Blue & Red
Black & Red
Black & Brown
Black & Dark Blue
Light Blue & Red
Black & Burgundy

* When using a Spot Pantone® Color in your file, it needs to be named and colored the actual Pantone® name and number being used to print your order.

IMPORTANT!

Please indicate your color separations on your order blank.

SUBMITTING YOUR FILES

1. Once your files have been set up according to these guidelines, give them to your business partner to submit to Navitor.
2. We can accept your files on 3.5" floppy disks, 100MB Zip disks, CD-Rs, DVDs, online at Navitor.com, or via e-mail at folderorders@navitor.com.
3. DO NOT send us the only copy of your file. The disk or file could possibly be lost or damaged in the mail. A copy of the original is preferred.
4. We reserve the right to use all products in our advertising and displays unless otherwise specified in writing at the time of the order.

Please visit Navitor.com for further information on submitting files.

Pantone®, PMS and Pantone Matching System® are Pantone Inc.'s check-standard trademark for color reproduction and color reproduction materials.

Folder orders are produced at Navitor Midwest.

general information

art charges: If your layout requires special attention or your artwork is unsuitable for reproduction, we will make the necessary changes. You will be notified if artwork charges apply.

changes or cancellations: Changes to orders in progress may require additional charges and/or time. Cancellations after an order is in progress will require payment for work completed.

die charges: There is an additional charge for a standard 5" envelope slit, 4¼" custom pad slit, standard 2" x 4" size window, flash drive slits or standard file card punch out dies. All other special die cut dies will vary in cost according to the size and amount of detail in your design. Call or send design for a price quote. Allow 5 working days. For orders shipping direct, dies are returned to the dealer at no additional cost.

duotones: Two screened ink colors printed on top of each other.

engraving: This process is available with folders. Call for quote.

FasTurn® folders: **24hr** production example: if order is received Monday by Noon CST, order ships on Tuesday. Prices and production time based on sending print ready artwork. Dies are recycled and not returned. Ink and foil colors are available only as shown. Please indicate style FLDR-FN2 on your order. **Any changes or alterations to FasTurn® features, standard pricing will apply.**

final folding: Orders are shipped with folders open. If folders need to be folded in half when they are shipped, please indicate on order blank.

laminating: Call for pricing and availability. Allow an additional 5 working days.

over/under runs: All presentation folder orders are subject to a 10% over run or under run. No charge for exact quantity. Please indicate on order blank.

proofs: Black and white and color proofs are available. Color proofs may not be exact. Add 2 working days to the production time when requesting a proof. Printed press proofs are billed as actual orders of the minimum quantity less 10%.

rush orders: If production schedule allows, charges for rush orders are based on time constraints and complexity of the order. Contact us for availability and pricing.

third party shipping: Additional charge apply, contact us for pricing.

foil and embossing

die handling: You may provide a blind embossing, die cutting, foil embossing or foil stamping die for re-orders.

die types: Various types of dies are available. See blind embossing, die cutting, foil embossing and foil stamping to determine the appropriate die charge. Foil stamping and embossing dies are not returned.

copper dies: These single level dies are used for foil stamping and blind embossing. Copper dies provide crisp quality without the expense of a brass die.

brass dies: These single or multi-level sculpted dies are used for blind embossing or foil embossing. These dies produce a deep, crisp image with well-defined edges. Note: Fine lines and type do not foil emboss well. Fax or mail artwork for a quote.

foil charges: Special foil colors are available. Call for a quote. If foil area exceeds 36 square inches within two areas, there will be an extra foil charge. Please call for a quote. All foil imprints require the use of a die (see die types).

foil embossing: This is a process that combines foil stamping and embossing into one press run. A brass die is required for this process. Send artwork for a quote.

foil stamping or blind embossing: Orders with one area of foil stamping or blind embossing up to 36 square inches within two areas, there is no additional charge for the die. For orders not within these restrictions, call or send artwork for a quote due to extra foil charges. Charges for dies vary according to the size and amount of detail in your design. We will notify you of any additional costs before processing your order. Send actual sized artwork or a sample for an estimated die charge.

screened foil: The maximum allowed screen is 45% with a minimum of 20%. Screened foil cannot exceed 16 square inches in one area. Imprint width and/or height cannot exceed 6 inches when the screen is a solid area.

additional die set-up: If more than two dies are used, an additional die setup charge and die charge is needed.

four color process

four color process: The pricing for four color process printing includes four process ink colors.

color matching: Industry standard ink densities are used for both PMS® and four color process. If color matching is needed, it must be clarified and approved before production begins.

UV coating: This ultra violet process is available with four color process only.

heavy ink coverage: Any solid or screened areas exceeding 15% of the front or back cover (4"x 4" area) must be flat printed. Any solid areas exceeding 45% (**7" x 7" area**) of the front or back cover will require the heavy ink coverage add on price. In-shop time is 7 days for three or more inks and for two-sided work. Heavy metallic ink not available.

inside copy: Printing inside above pockets requires an extra charge due to the additional press run required. Please refer to the price pages for the applicable charges. Additional production time is also required.

pocket copy: When laying out copy for folder pockets, allow 7/8" additional margin for reinforced edges. Printing ink on folder pockets is not considered inside copy.

ink

screens: A screen is a dot pattern of a solid ink color that makes that color look lighter. For example, when red is screened it looks pink. There is no additional charge for screens. Standard screen percentage is 20%, which will be used unless otherwise indicated. We use 120 line screen. Foil is available screened.

special ink: Special inks are available per color by selecting from the PANTONE® Color Formula Guide. Requesting an exact match from a color swatch or sample will require an additional color match charge.

standard inks: All standard inks are translucent inks. We do not recommend printing ink on dark colored stocks due to the ink discoloring. A no-charge reprint is not available when printing inks on dark colored stocks.

thermography: No additional charge for folders printed in thermography. Legal folders, card carriers, tri-fold folders, Conformer® envelopes, file jackets, vertical pocket folders, multimedia holders, landscape folders, portfolios and style BF8 cannot be printed in thermography. Large imprint areas are not recommended. Thermography cannot register with other processes.
